

Case Study

Real Results: Regional 7 Hospital Health System

How a 2,500+ Bed Health System Achieved AI Transformation in just 18 Months

45%+

Efficiency Gains

\$3.2M

Cost Reduction

300%+

ROI Achieved

The Problem: Manual Workflows Holding Revenue Cycle Back

A 7-hospital, 2,500+ bed system operating on disconnected, manual processes

30+ Staff Manual Effort

Manually managing 7 disconnected RCM workflows across facilities.

Spreadsheet Reporting

No real-time visibility into performance; reliance on static monthly data.

Processing Delays

Significant backlogs in posting, correspondence management, and claims.

Rising Labor Costs

Escalating overhead with no scalability for volume growth.

DSO Exceeding Benchmarks

Cash flow lagging across all facilities due to manual bottlenecks.

“What used to take a team of 30+ across seven workflows now runs with precision and speed.”

The Solution: 18-Month Phased AI Rollout

De-risked deployment — one workflow at a time

The Results: ROI Across Every Dimension

Measurable outcomes delivered within 18 months of full deployment

45%+

Efficiency Gains

Streamlined across all 7 workflows

\$3.2M

Cost Reduction

Direct operational & labor savings

300%+

ROI Achieved

Within 18 months of deployment

15,000

Hours Saved / Yr

Manual processing eliminated

10+

Days DSO

Faster collections & cash flow

25–30% RCM Workforce Optimization | 30+ Roles Automated

How We Measure ROI: Three Dimensions of Value

iCAN™ delivers compounding returns across staff, cost, and revenue

Staff Effort Savings

**1,500+ Hours
Recaptured Annually**

- 175 daily transactions × 120 sec = 5.8 hrs/day automated
- \$48,000/year in labor value redirected per workflow
- Teams redeployed to high-value exceptions & decisions

Cost Avoidance

**3.21× Productivity
Multiplier**

- Digital employees operate 24/7/365 vs. human 8/5/260
- 30+ roles automated = 25–30% workforce optimization
- Eliminates overtime, temp staffing & turnover costs

Faster Revenue Recovery

**10+ Day DSO
Improvement**

- Zombie Claims™ recovers previously stalled lab revenue
- Real-time dashboards replace monthly static reporting
- Faster posting & correspondence = shorter denial-to-cash cycle

Cash Posting: The ROI Math, Transparent

A single-workflow model showing exactly how returns are calculated

Workflow Inputs

Transactions/Day 175

Time/Transaction 120 sec

Daily Hours (Manual) 5.8 hrs

Staff Hourly Rate \$32/hr

Annual Manual Labor ~\$48,500

Annual Value Delivered

BOT Replacement Value \$27,827

Employee Productivity Gain \$19,386

TOTAL VALUE / YR

\$47,213

Investment vs. Return

Year	iCAN™ Cost	Net Gain	RVI
Year 1	\$46,000	+\$1,213	0.86×
Year 2	\$36,000	+\$11,213	1.38×
Year 3	\$36,000	+\$11,213	1.38×

"This single-workflow model scales 7×. Combined, they drive the system-wide \$3.2M savings and 300%+ ROI."

RVI = (BRV + EPG) ÷ Total Investment | DC = 3.21 × (24/7/365 ÷ 8/5/260)
